## Blue PE pipes and fittings for water supply on the World's longest Sea Crossing

2016

Hong Kong Zhuhai Macao Bridge - a 55km Mega bridge connecting Hong Kong, Zhuhai and Macau. Mill-Pro supplied Blue PE pipes and fittings to the Hong Kong Water Supplies Department (WSD) specification for use as water supply and firefighting lines on the Hong Kong side of the bridge island. The Pipes and Fittings were supplied to China Harbour Engineering Company Ltd over a 3-year period from Mill-Pro's Hong Kong stocks, in sizes 90, 125, 180, 250 and 315mm OD.

PE is perfect for use in reclaimed land, because it is an "end to end" system, the PE is anchored at the connections and will stretch and adapt to the continuously settling environment found in reclamation environments.
